

## General Information

Chemical Formula	CH <sub>3</sub> COOCH <sub>2</sub> CH <sub>3</sub>	
Synonym	Ethyl Acetic Ester	
Origin	China	
H.S. Code	29153100	
CAS No.	141-78-6	
Molecular Weight	88.11 g mol <sup>-1</sup>	

## Application

Solvent	Ethyl Acetate is commonly used in a wide range of applications, including printing, inks, varnishes and car care chemicals and in the production of enamels, plastics and rubber.
Paint and Coating	It is used in variety of paint and coating formulations such as epoxies for applications in wood furniture and fixtures, agricultural, construction and mining equipment, auto refinishing and marine etc.
Other applications	Ethyl Acetate plays a role in manufacturing printing inks, in the packaging industry and in the production of adhesives.

## Specification

Property	Units	Value
Appearance		Colourless Liquid
Purity	%	≥99.5
Residue on Evaporation	%	≤0.003
Water	%	≤0.2
Titrateable acid	meq/g	≤0.0008

## Packaging

- 80 @ 180 kg Drum; 14.4 MT / 20'FCL
